## Data Guide

This app accepts general workload, ticket, task, queue, or operational datasets.

Recommended columns: `created_date`, `team`, `workstream`, `priority`, `status`, `estimated_hours`, `actual_hours`, `capacity_hours`, `due_date`.

If some optional fields are missing, the app creates reasonable defaults so the dashboard remains usable.

| work_id  | created_date        | closed_date         | team             | workstream     | priority | status      | estimated_hours | actual_hours | capacity_hours | due_date            |
|----------|---------------------|---------------------|------------------|----------------|----------|-------------|-----------------|--------------|----------------|---------------------|
